LinkedIn Profile:
[Nurhasnatul Aida Profile](#)

SKILLS

Frontend:

- Vue.js, Vuex, Pinia
- HTML5, CSS3, SCSS, JavaScript, Bootstrap
- Flutter
- Ionic
- Python

Backend & Database:

- Node.js
- MSSQL
(SP creation, optimization)
- Firebase

Tools & DevOps:

- GitLab & GitHub (push, pull, merge)
- IIS (manual deployment)
- Postman
- Burp Suite

Mobile:

- Flutter iOS & Android

Soft Skills:

- Attention to detail
- Cross-team & cross-country collaboration
- Fast learner & adaptable
- Problem-solving

Languages:

- Malay (Native)
- English (Fluent)

EXECUTIVE PROFILE

Frontend Developer with over 3 years of combined experience in web and mobile application development. Specializes in Vue.js (including Vuex and Pinia) with additional experience in Flutter for cross-platform mobile apps. Detail-oriented, with a focus on accurate implementations. Experienced in handling APIs using Node.js and creating and optimizing stored procedures (SPs) with MSSQL. Collaborating with cross-functional teams in Agile environments.. Strong interest in AI projects like ChatGPT and data-driven UIs. and continuous self-improvement in the tech field.

WORK EXPERIENCES

Software Engineer

redONE Network Sdn Bhd | 2022 – Present

- Developed and maintained control panel systems using Vue.js, Vuex, and Pinia
- Handled API interactions using Node.js
- Created, improved, and optimized stored procedures (SPs) in MSSQL
- Collaborated with backend developers, project managers, and various departments to ensure accurate and consistent data flow.
- Used GitLab for versioning (push/pull/merge); deployed manually to IIS server

PayrollPanda | 2020 (6 months)

- Conducted manual testing for HR and payroll web applications
- Wrote and executed structured test cases
- Verified resolved issues and performed regression testing
- Worked primarily in a fully remote setup, with occasional office visits
- Collaborated with a programmer based in Hong Kong, gaining international remote work exposure
- Learned SDLC stages and Agile QA methodologies

ACHIEVEMENTS

- **DreamHack (2019)** - Python Participant
Develop face recognition system for sign in attendance
- **Human Computer Interaction Day (2017)**
Participant
Develop new technologies based on the problem from surrounding
- **Cloud Marvel Hacathon Challenge (2017) - Augmented Reality**
Fourth Place
Develop Augmented Reality for Videography categories
- **Islamic Comic competition (2017)**
First place
Design and create story line for Islamic comic

OTHER ACTIVITIES

- **Sukan Sekolah Komputeran 2020 (SUSKOM)**
Double Women Badminton Participant

PROJECTS

WEB DEVELOPMENT

redONE Control Panel System (Vue js, node js, mssql)

Customer Management System

Developed a Vue.js-based control panel for customer management and analysis, enabling the seamless addition and modification.

redONE Package Configurator Web App (Flutter Web)

Telco Plan Management System

Developed a web-based package configurator using Flutter, allowing users to create and update various subscription or service plans dynamically

UTM SPORT HALL SYSTEM (Node js, html,css, sql)

Web Programming Course

The website allows user to book court based on the date and the availability

- https://youtu.be/agH1xDx_uEo

MOBILE DEVELOPMENT

FINAL YEAR PROJECT: FACE RECOGNITION USING FACENET ALGORITHM FOR CHILDHOOD CENTRE (Flutter, Python, Firebase)

Mobile Application Pusat Jagaan Al-Hafiz Management System

The final year project aims to enhance the security system for the childhood center by notifying any unrecognized face detected. It also comes with a childhood center management system. Developed using Python, Dart, and Firebase.
